javaPlex history

Stanford software packages for persistent homology and topological data analysis:

2000-2006 Plex

C++ with Matlab bindings

Vin de Silva, Patrick Perry.

2008-2010 jPlex

Java – for easier Matlab integration

Harlan Sexton, Mikael Vejdemo-Johansson, Henry Adams.

2010- javaPlex

Java – for easier extension and development

Andrew Tausz, Mikael Vejdemo-Johansson, Henry Adams.

Persistent homology

- Point cloud data **generates...**
- Filtered simplicial complex **computes...**
- Persistent homology groups **described by...**
- Barcode pictures **encoding...**
- Estimated topological features

Interoperability

- Matlab
- Jython
- Processing (see GTS demo session!)
- Mathematica
- Scala
- ... anything JVM really
